

Running Generic Data Base Reports

In this lesson you'll accomplish the following:

- ✍ Access the GDB Reports menu
- ✍ Select the report desired
- ✍ Enter report and sort options when prompted
- ✍ Run the report

NOTE: Access the Generic Data Base system by first double clicking on the APHIS Menu icon. At the logon window enter the assigned username, password and database and press **ENTER**. Use the **TAB** key to move between the username, password and database fields.

The screenshot shows a 'Logon' dialog box with a blue title bar and a close button (X). It contains three text input fields: 'Username:' with the text 'betauser', 'Password:' with masked characters 'xxxxxxx', and 'Database:' with the text 'prgd'. Below the fields are two buttons: 'Connect' and 'Cancel'.

Exercise 1 - Selecting reports

Step 1

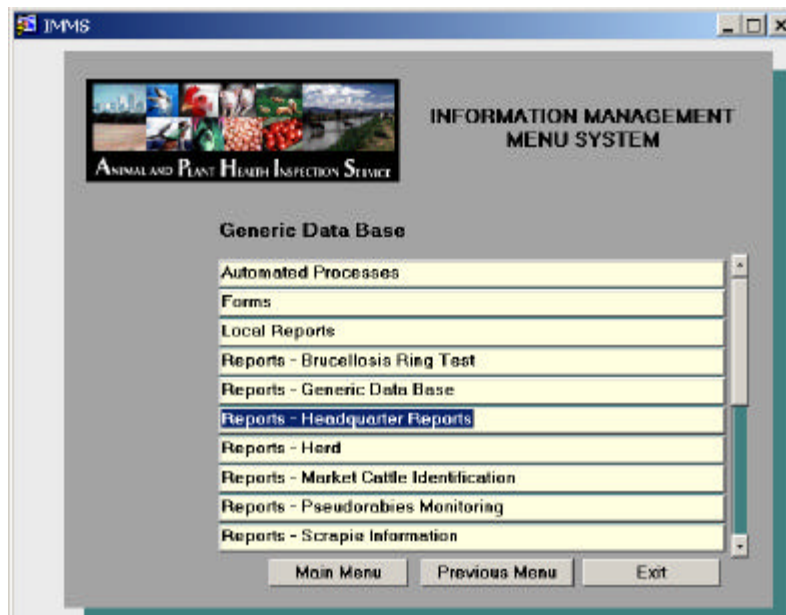

Access the GDB Menu. Begin by clicking on the *Generic Data Base* option from the Information Management Menu System Main Menu.

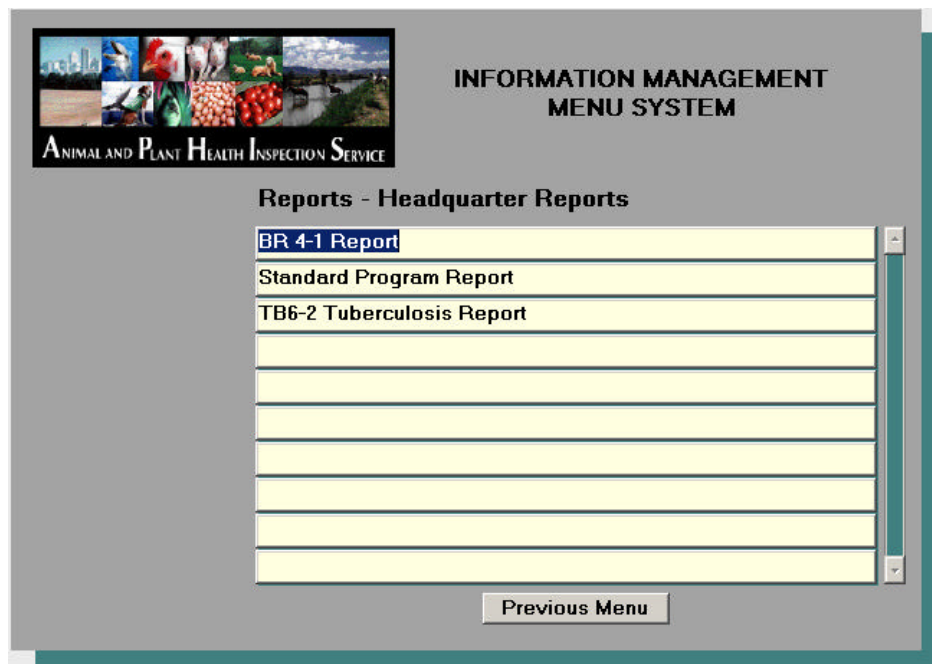

Step 2

Click on the type of report you want to run from the Generic Data Base menu.

Headquarter Reports include the BR 4-1 Report, SPR Reports and the TB 6-2 Report. Other reports are organized by disease such as BRT, MCI, HERD, Pseudorabies, Scrapie and TB. The menu also has options for local reports and Utilities. In the examples that follow, Headquarter Reports was selected, bringing up the Headquarters Report menu.

Step 3

Once a report has been selected, report options will appear as shown below. You have the option of saving the report file to disk if you want to save a copy of the report. If you choose this option, the file will be saved in the C:\NCAHIS\Reports directory with a distinct numeric extension, i.e., .001, .002, etc. If you do not wish to save the report file to disk, the file will be saved with a .LST or a .PDF extension and replace any previous edition of the report with that extension. Choose the Landscape orientation option to print a report in a larger format. Some reports, especially the NTL reports, require compressed print to print reports in the Portrait orientation. If the scrolling arrow button appears next to an option field, you can click on the button to display additional options. Press **[Tab]** to move from field to field. Click the **Run Report** button when all options have been selected.

Output

Exercise 2 - Headquarter SPR - BRT Report

This report provides Ring Test Result activities in a given round for herds located in the state regardless of where tested. It provides Section J of the SPR Report.

Step 1

Follow steps 1 and 2 of Exercise 1 and select the Headquarter Reports option and the Standard Program Report option. Select section J and enter the State Code, Disease, Species and the Round Number as shown below.

A sample of the BRT Report is shown below:

```

Georgia                                BRUCELLOSIS RECORDING AND REPORTING SYSTEMS                                PAGE 1
BRTNTL                                MONTHLY REPORT OF BRUCELLOSIS PROGRAM ACTIVITIES                                21-Oct-1999 10:23am

Exercise 3 - Headquarter SPR - HERD Report

This report provides Sections A through F of the SPR Report for a specified date range. Section A provides information on cattle tested on farms or ranches; Section B, on infected herds in the state; Section C, on the herds depopulated; Section D, on herds pending test or retest; Section E, on certified brucellosis free herds; and Section F, on blood tests in other species.

Step 1

Follow steps 1 and 2 of Exercise 1 and select the Headquarter Reports option and the Standard Program Report option. Select the appropriate section and enter the State Code, Disease and Species as shown below.

A sample of the Brucellosis Monthly Report - HERD is shown below:

Georgia		Generic Database								Page 1			
GA		Standard Program Report For Tests on Farm or Ranch								Dz: BR		Spe: BOV

Exercise 4 - Headquarter SPR - VAC Report

This report provides Section K of the Brucellosis Monthly Report. For a specified date range, it summarizes vaccination information on calves and other cattle.

Step 1

Follow steps 1 and 2 of Exercise 1 and select the Headquarters Reports option and the Standard Program Report option. Select section K and enter the State Code, Disease and Species as shown below.

The screenshot shows a window titled 'devlco-APPL' with a menu bar (Action, Edit, Query, Block, Record, Field, Window, Help) and a title bar 'SPRMENU'. The main area is titled 'SPR Reports' and contains several sections:

- State:** GA
- Disease:** BR
- Species:** BOV (with a dropdown menu showing 'not species Sect F' for each selection)
- Start Date:** 01-JAN-2000
- Stop Date:** 30-JUN-2000
- Round:** (empty field)

Exercise 5 - Headquarter SPR - MCI Report

This report provides Sections G, H, and I of the Brucellosis Monthly Report for a specified date range. Section G lists blood sample collections at slaughter; Section H, blood tests on market cattle and bison tested in state; and Section I, tracebacks of MCI reactors.

Step 1

Follow steps 1 and 2 of Exercise 1 and select the Headquarter Reports option and the Standard Program Report option. Select section J and enter the State Code, Disease and Species as shown below.

A sample of the Brucellosis Monthly Report - MCI is shown below:

```

Exercise 6 - HERD300: Preprinted Worksheets

This report generates a Preprinted 4-34 Worksheet for each ES_NR entered.

Step 1

Follow steps 1 and 2 of Exercise 1 and select the HERD300: Preprinted Worksheets option. Enter the report option desired, and the ES_NRs as shown below. Press **[Enter]** to move to the next prompt. The system will automatically run the report after you enter the last ES_NR. (Up to 10 ES_NRs can be requested.)

```
*** HERD300: Preprinted 4-34 Worksheet ***
```

```
Report Options:
```

```
1 = All Animals
2 = Reactors
3 = Suspects
4 = Reactors and Suspects
5 = Non Reactors
6 = Stop
```

```
Enter Option: 4
```

```
Enter 1-10 ES_NRs:
```

```
Enter ES_NR #1: 19990110006H
```

A sample of the HERD300: Preprinted Worksheets is shown below:

```

Exercise 8 - PRMS122: Status Pending List

This report provides a list of all herds with an open status. Specific Status Codes or Section Numbers can be indicated. The report covers a date range for a specified state and disease.

Step 1

Follow steps 1 and 2 of Exercise 1 and select the PRMS122: Status Pending List option.

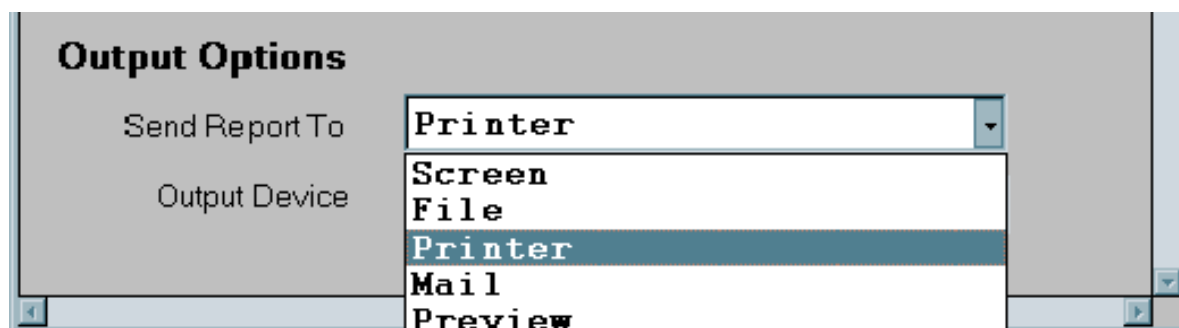

The screenshot shows the 'PRMS122: Runtime Parameter Form' window. The title bar is pink. The menu bar includes 'File', 'Edit', 'Window', and 'Help'. The top navigation bar has buttons for 'Previous', 'Next', 'Run Report', and 'Cancel'. The main content area is titled 'PRMS122 Open Status/Testing Activity'. Under the 'Select Report Options' section, there are two dropdown menus: 'All Status Codes? (Y/N):' set to 'Y' and 'All Section Numbers? (Y/N):' set to 'Y'. Below these is a red instruction: 'Select "Next" to Enter Status Codes or Section Numbers'. Further down, there are date fields: 'Begin Collection Date:' (01-jan-1999) and 'Ending Collection Date:' (30-jun-1999), both with '(DD-MON-YYYY)' format hints. Below the dates are text fields for 'Enter State:' (ga) and 'Enter Disease:' (prv). A 'Sort Options:' dropdown is set to 'Premises ID'. At the bottom, under 'Output Options', there is a 'Send Report:' dropdown set to 'Preview' and an 'Output Device:' text field.

Enter the report options desired. If you do not want All Status Codes or All Section Numbers, select N, then click [Next] on the top button bar to enter the specific status codes or section numbers. At least one entry must be made for each item checked N. The following screen displays when the [Next] button is pressed.

The screenshot shows the 'PRMS122: Runtime Parameter Form' window after clicking the 'Next' button. The title bar is green. The menu bar and top navigation bar are the same as in the previous screenshot. The main content area is titled 'PRMS122 Open Status/Testing Activity'. It now displays two sections: 'Enter 1-10 Status Codes' and 'Enter 1-10 Section Numbers'. The 'Enter 1-10 Status Codes' section has ten text input fields labeled 'Status Code 1:' through 'Status Code 10:'. The 'Enter 1-10 Section Numbers' section has six text input fields labeled 'Section NR 1:' through 'Section NR 6:'.

After entering the Beginning and Ending Collection Dates, State Code, and Disease Code, choose from three sort options available: Premises ID, Premises Name and SSN.

As shown below, five Output options are available: Screen, File, Printer, Mail, Preview.

The *Preview* and *Screen* options bring the formatted report to the computer screen. Selecting *Printer* will allow the report to be printed. Selecting *File* allows you to save a copy of the report to the C:\NCAHIS\GDB\Reports directory.

Click on the *Run Report* button to run the report. A sample of the PRMS122: Status Pending List report is shown below:

PRMS122

893405007	Stephenson Partners Genetics	Vienna	QUAL	20 JAN 1995	HQ		

*Note: This report originated as a Pseudorabies report, but it has been adapted for other diseases.

Exercise 9 - PRMS170: Traceback

This report provides a list of pseudorabies positive backtagged swine that have not been traced to a herd of origin. These animals do not have an associated owner prem ID (sample form) or closed trace (status form).

For all three report options, each origin prem ID, (the place where the animal was backtagged) starts a new page with market information at the top. The report can be used at the place the backtag was applied to fill in additional information about the herd of origin. It can then be returned to the office and entered into the GDB system. Backtags not associated with a market prem ID are listed together.

Step 1

Follow steps 1 and 2 of Exercise 1 and select the PRMS170: Traceback option. Three report options are available: Date Range, 1 - 10 Origin (Market) Prem Ids and 1 - 10 Case Numbers.

- ✎ Select Date Range to generate a traceback report for a specific date range sorted by backtag number.
- ✎ If option 2 or 3 is selected, press **[Next]** to enter specific Origin (Market) Prem Id's or Case Numbers. At least one entry must be made to run the report. Click on the **[Previous]** button to return to the first page of the form.

- ✎ Backtag records without a market Prem ID cannot be retrieved using option 2 because a blank is not recognized as a valid premises ID. Use either option 1 or 3 to retrieve these records.

After selecting the desired report option, enter the Beginning and Ending Entry Dates and the State Code.

The same five Output options discussed in Exercise 8 are available: Screen, File, Printer, Mail, Preview. The *Preview* and *Screen* options bring the formatted report to the computer screen. Selecting *Printer* will allow the report to be printed. Selecting *File* allows you to save a copy of the report. Click on the *Run Report* button to run the report. A sample of the PRMS170: Traceback report is shown below:

The screenshot shows a window titled "PRMS170: Previewer" with a menu bar (File, Edit, Window, Help) and a toolbar with buttons: Prev, Next, First, Last, Page: 2, Print, Mail, Close, New. The report content is as follows:

PRMS170
Georgia

PSEUDORABIES MONITORING SYSTEM
TRACEBACK REPORT
Between 01-JAN-1999 and 30-JUN-1999
By ID Number for Market Premises ID

Information for Blank Origin ID's

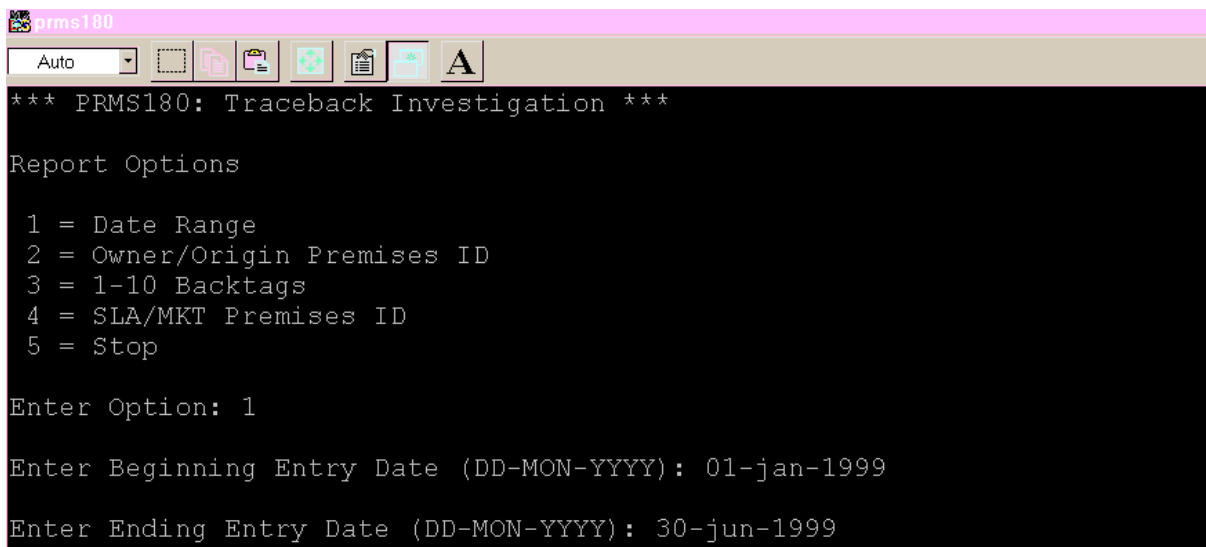

ID Number	Case Number	Collect Date	Premises ID	Test Type	Test Result	Tag Date	Owner Name	Owner Address
*** End of Report PRMS170 ***								

Exercise 10 - PRMS180: VS#7-2 Traceback

This report provides a VS Form #7-2 for Pseudorabies Market/Slaughter Traceback Investigation. The form is designed to aid field investigations of the herd of origin for pseudorabies positive animals. A VS Form #7-2 is produced for each backtag with an associated owner Prem ID (sample form), where the associated TRACE Status (status form) is open.

Step 1

Follow steps 1 and 2 of Exercise 1 and select the PRMS180: VS#7-2 Traceback option. Four report options are available: Date Range, Owner/Origin Premises ID, 1 - 10 Backtags, and SLA/MKT Premises ID.

```

*** PRMS180: Traceback Investigation ***

Report Options

1 = Date Range
2 = Owner/Origin Premises ID
3 = 1-10 Backtags
4 = SLA/MKT Premises ID
5 = Stop

Enter Option: 1

Enter Beginning Entry Date (DD-MON-YYYY): 01-jan-1999

Enter Ending Entry Date (DD-MON-YYYY): 30-jun-1999

```

- ✍ The Date Range option generates a VS Form #7-2 for each animal with an open TRACE Status that has a status issue entry date within the specified date range, and also creates a summary of backtags and owner premises IDs.
- ✍ The Owner/Origin Premises ID option generates all VS Form #7-2's for a specified owner associated with an origin premises ID.
- ✍ The 1-10 Backtags option generates all VS Form #7-2's for specified backtags. As many as 10 can be entered.
- ✍ The SLA/MKT Premises ID option generates a summary of backtags and owner prem ID's.

Note: Origin Prem_ID is the market at which backtags were applied. Owner Prem_ID is the premises (farm) from which the animal was brought to the market.

*** END OF REPORT PRMS180 ***

Exercise 11 - PRMS230: Invoice

This report provides a copy of the VS Form 8-18 for each payee. It contains pertinent information about the payee and provides a summary check list of amounts payable to fee-basis veterinarians. The summary check list prints after all invoices have been processed. The report lists invoices for all services entered within a date range or for a Person ID. It is grouped by each fund type.

Step 1

Follow steps 1 and 2 of Exercise 1 and select the PRMS230: Invoice option. Four report options are available: Date Range, 1-10 Person IDs, Reissue Invoices, and Summary Checklist only. Two report sort options are available: Person's Last Name or SSN Tax ID.

```
*** PRMS230: Invoice ***

Report Options:

1 = Date Range
2 = 1-10 Person ID's
3 = Reissue Invoices
4 = Summary Checklist only
5 = Stop

Enter Option: 1

Sort Options:

1 = Person's Last Name
2 = SSN/Tax ID
3 = Stop

Enter Option: 1

Enter Beginning Entry Date (DD-MON-YYYY): 01-jan-1999
Enter Ending Entry Date (DD-MON-YYYY): 30-jun-1999
Enter Fund or ALL: all
```

- ✍ The Date Range option generates information in the date range selected.
- ✍ The 1-10 Person Ids option generates information for a date range for 1 to 10 Person ID's selected.
- ✍ The Reissue Invoices option reissues invoices for a date range, specific Fund, and Person ID.

A sample of the PRMS230: Invoice report for options 1-3 is shown below:

Exercise 12 - PRMS240: Summary Vet Pay

This report provides total fee basis payments made to each veterinarian or clinic. It also totals the expenditures for the reporting period.

Step 1

Follow steps 1 and 2 of Exercise 1 and select the PRMS240: Summary Vet Pay option. Two sort options are available: Social Security Number, Person Name, and Person Name. After entering the sort option desired and the Beginning Entry Date and Ending Entry date, select invoices Paid, Not Paid or Both. Paid indicates an invoice has been processed or sent; Not Paid, has not been sent; and Both, for all regardless of payment.

A sample of the PRMS240: Summary Vet Pay report is shown below:

Exercise 17 - TB 6-2 Report

This report provides headquarters with a regular update of activities related to tuberculosis.

Step 1

Follow steps 1 and 2 of Exercise 1 and select the Headquarter Reports TB 6-2 Report option.

The screenshot shows a window titled "devlco-APPL" with a menu bar (Action, Edit, Query, Block, Record, Field, Window, Help) and a sub-window titled "WINDOW1". The main area is titled "TB6-2 Report Parameter Form". It contains the following fields and controls:

- State:** A drop-down menu with a blue arrow icon, followed by the text "(Ex: GA)".
- Start Date:** A text input field.
- End Date:** A text input field, followed by the text "(Ex: DD-MON-YYYY)".
- Send Reports to PDF Files:** A checkbox.
- Send Reports for Printing:** A checkbox.
- Create Transmittals:** A checkbox.
- Submit:** A button.
- Exit Screen:** A button.

At the bottom of the window, there is a status bar showing "Record: 1/1".

Step 2

Select the appropriate state from the drop-down list. Enter the Start and End date range.

Step 3

Select the desired output for the report. You can create PDF files, print the report or create transmittal files. A sample of the TB 6-2 Report is shown below:

Exercise 18 - PRV190 Report

This report provides headquarters with a regular update of activities related to pseudorabies.

Step 1

Follow steps 1 and 2 of Exercise 1, select the Pseudorabies Monitoring option and select PRV190 Pseudorabies Report.

The screenshot shows a software window titled "devlco-APPL" with a menu bar (Action, Edit, Query, Block, Record, Field, Window, Help) and a sub-menu bar "SPRMENU". The main area is titled "PRV Reports".

Form fields and options:

- State: GA
- Disease: PRV
- Species: POR (dropdown)
- Start Date: 01-JAN-2000
- Stop Date: 30-JUN-2000
- Run Reports: ☒ (checked)
- Run PDF's: ☐
- Run Transmittals: ☐
- Transmittals: Sect A, Sect B, Sect C, Sect E, Sect F (all unchecked)
- Detail: Sect A, Sect B, Sect C, Sect E, Sect F (all unchecked)
- Submit Reports button
- Create Details button
- Five empty input fields stacked vertically below the date fields.

Step 2

Select the appropriate state, disease and species from the drop-down lists. Enter the Start and Stop Dates. Enter the section of the report desired.

Step 3

Select the desired output for the report. You can create PDF files, print the report or create transmittal files. A sample of the PRV190 Report is shown below:
